DETAILED ACTION

1. Applicant's reply filed on 6/28/05 withdrawing claims 4-6 confirms the election of group I. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election **without** traverse (MPEP § 818.03(a)). Since new claims 7 to 9 are depended on non-elected invention, these claims are hereby also withdrawn from consideration.

2. Claims 1 and 3 as amended overcome the rejections and patentable the cited prior art.

Conclusion

3. This application is in condition for allowance except for the following formal matters:

Claims 4-9 are drawn to on-elected invention.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **ONE MONTH** from the mailing date of this letter.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Fujine et al (U.S. Patent No. 5,858,056) disclose sintered body composite material comprising sintered porous body having a space lattice structure having pores, which are impregnated with an aluminum alloy. The porous metal sintered body has a volume percentage preferably from 55 to 85% (or 15 to 45 in porosity), col. 7, lines 7-14. In col. 15, lines 26+ Fujine et al disclose a porous metal sintered body in form of a ring enveloped in aluminum alloy by die casting. There is no teaching of the ring thickness.
